## 1. Introduction

Topic – Entertainment - Movies

Sewwandi Premarathna - Student 1 - Presentation page and the Buy products part

Ravindu Liyanaarachchi - Student 2 - Main page, Navigation bar and the Query form

Madusha Thumbowita - Student 3 - The student details and the Quiz

Dasith Gamage - Student 4 - Site map and Thumbnail Images

## 2. Technical Discussion

Max 1000 words

Student 3:

- Quiz
- Student details

### Student Details.

When user click on the About us button on the menu bar the student detail page will open. I put the heading as “ Our Team “.below that there are four pictures of group members horizontally displayed on the page. The div tag is used to do this and it also used to display each member details. An example is displayed below ,

```
<div class= "new">
    <div class="column">
        
        <div class="text1">
            Sewwandi Premarathna
            <Br>
            Student 1
        </div>
    </div>
```

An embedded CSS sheet used to do the styling part of the page and combined student 3's CSS sheet to that to get the graphical view of the page. In that CSS part I created a background for the second text which has put on the member photo. When you move your curser to the each picture it will display group member's name and role on a transparent black background. For that to work, I used hover effect in CSS styling sheet.

### Quiz

The timer will start when the “Quiz” is clicked on the website menu bar. After that, you have 1 minute to complete the quiz. The HTML form tag used to create the questions and used the radio buttons to create the multiple answers.

```
if(question1=="3"){
    correct++ ;
    marks = marks + 2
    document.getElementById("line_1").innerHTML= line1;
}
```

In Java script I used if else function to confirm the correct answers . When you are done with the questions you have to click done button on the bottom of the page and you can see a box appearing. It displays your correct answers, your marks and a statement according to your mark. If you didn't submit it manually after 1 minute it will automatically display the box.

### 3. Janet

I did not access financial, administrative, or exam data without permission, and also I didn't use another user's username and password with or without their constant (computer misuse act 1990). I didn't copy write others' data without giving credit to the other (copyright, designs & patents act 1988). I did not create or introduce a virus. (Computer misuse act 1990).

## Appendix C: Individual Statement

Student Name:	Madusha Thumbowita	Student Id:	w1790818
State what tasks you carried out in the project.			
Student Details Quiz			
State what you enjoyed and did not enjoy about teamwork.			
I enjoyed the team work			
State what you learnt about teamwork.			
It's important to help each other when we are doing a task as a team.			
State what skills you gained/learnt from undertaking the project.			
HTML5 Coding Coding in Java Script			
State any strengths about yourself that emerged whilst undertaking the project.			
Communication between members Leadership Skills			
State any weaknesses about yourself that emerged whilst undertaking the project.			
Time Management			
State how you would do things better if you were to undertake the project again.			
I will try to start the coursework early.			
Additional general or project specific comments:			
Student Signature:	Madusha	Date:	24/03/2021
